Submission Guideline for Project Scenario Description

➢ Very carefully read each of the instructions below!

➢ You have to submit your project name along with the scenario description in the moodle within 10 PM of this Sunday (08/10/17).

➢ First of all, create a doc/docx file. The format of the file should be **<Student Id1>_<Student Id2>_<Your Proposed Project Name>.docx (or doc)**. For example, *1505000_1505125_BUET Medical Center Management.docx*. For those who are doing individual project, the example can be *1505000_BUET Medical Center Management.docx*.

➢ Inside the doc/docx file, write down the scenario description. For simplicity, you don't have to divide the scenario into 2 modules. Just write down the scenario in a single module. But it is ok to divide the scenario into two modules if you prefer it.

➢ Any one of the group has to upload the file in the moodle (You don't have to zip the file, just upload the doc/docx file).

➢ You have to finalize the project along with scenario description after the permission of the supervisor. Your supervisor will be assigned before your next sessional class.

➢ In your next sessional class, after the practice of the database design, discuss with your supervisor about the project.

➢ You supervisor may change your project, so keep an alternative project name in your mind!

Missing Online 1 (Basic SQL)

Those who have missed online 1 on basic SQL due to any valid reason, mail madhusudan.buet@gmail.com mentioning your name, student id, contact number (optional), subsection and the reason with the proof (scan copy or any link of the related documents) within 10 PM, October 8, 2017 (Sunday).
